**EDENTA H1SNL**

Efficiently cutting special endodontic bur used for detecting all root canals in the case of multirooted teeth. The H1SNL has a particularly high cutting efficiency and its long neck ensures a clear view in deeper regions of the cavity for opening the access cavity of the root canal system. Use in a contra-angle with micromotor at 1,500 - 2,000 rpm, without cooling, dry and apply only light pressure during preparation.

**EDENTA ACCESS BURS FG/FGXL/FXXG**

Special endodontic bur with a long, conical blade configuration and cross-cut used for preparing a funnel-shaped access in the pulp chamber. The cross-cut guarantees quiet, efficient removal of tooth structure. The rounded, non-cutting bur tip (safe end) prevents penetration into the root canal walls and pulp chamber floor. Application after removal of the pulp chamber roof using the endodontic bur 802L for extending the access opening to ensure successful endodontic treatment.

**EDENTA DIAMOND BURS FG**

Special endodontic drill for reducing the pulp chamber roof and extending the access opening for successful root canal treatment. The long diamondcoated instrument neck facilitates producing a straight access to the root canal and creating a funnel-shaped access to the pulp chamber. The special diamond grit guarantees rapid and gentle removal of the tooth structure. Speed opt. 120,000 – 160,000 rpm, apply only light pressure during preparation.

**STODDARD CARBIDE BURS FGXL**

For a variety of procedures:-
• Initial endodontic access
• Sectioning of impacted molars
• Separating roots
• Removing a broken root stump
• Cutting a tooth horizontally

**STODDARD DIA ENDO I DIAMOND BURS FG**

Safe ended tip diamond burs used to remove the pulp chamber roof without damaging the chamber floor.

**STODDARD ENDO II CARBIDE BURS FGXL**

After initial penetration, these long, tapered burs create a funnel shape for easier access in the pulp chamber. The rounded, non-cutting safe-end tip prevents penetration of the pulp chamber floor or the root canal walls.
