ALL PRICES GST INCLUSIVE prices and offers subject to change without notice
OFFERS ARE NOT VALID IN CONJUNCTION WITH ANY OTHER SPECIAL/BONUS OFFERS AND SUBJECT TO STOCK AVAILABILITY
Goods sold are not returnable without prior approval. Returns and claims must be made within 10 days of delivery. Costs incurred by return goods will be at the sender's expense. Goods returned for credit or exchange must be unmarked and in a saleable condition.
All accounts are strictly 30 days from invoice date. We reserve the right to charge 2% interest per month on overdue accounts.

E-PEX

Smart, Accurate and Reliable
APEX LOCATOR

E-PEX Apex Locator
each \$396.00

Fast measurement Precise positioning

- Imported AI High-Speed Chip
- Advanced Multi - Frequency Technology
- High Precision in Wet & Dry Canals
- Automatic Calibration

Screen Display & Its Meaning

Didi alarm sound for a long time interval
Value:12
The corresponding scale value is 2, indicating the distance from the apex is about 2mm

Didi alarm sound interval becomes shorter
Value:09
It indicates that the distance from the apex is about 1.5mm

Uninterrupted long beep
Value:00
It indicates that the endo file has reached the apex

Very rapid Didi alarm sound
Value:-3
It indicates that the root canal file has exceeded the apex

-  Auto Start & Stop
-  Apical Reverse
-  Apical Slow Down

SPECIAL
\$330.00

Large 3.5" LCD Display

- Visual display of file position

Volume Adjustable

- Meets different usage needs

File Clip with Large Arc

- Easier file installation

Biomimetic-silica-wrapped File Clip

- Can be autoclaved more than 1000 times, avoid cross-infection

316L Stainless Steel Lip Hook

- Safer medical grade stainless steel

Powerful 1500 mAh lithium-ion battery

- Long-lasting battery life

Compact Size & Stable Design

- In line with clinical operating habits, more convenient to use

Model: E-PEX

Dimensions: 20cm x 17.5cm x 7cm ±1cm (package)

Weight: 650g ± 10%

Display: 3.5" colour LCD

Degree of Protection: IPX 0

Power supply: Lithium ion battery: 3.7V, 1500mAh

Charger power supply: AC100-240V 5.5VA 50Hz/60Hz

Frequency: 50/60Hz, ±10%

Power Rating: 0.3 W

Electrical safety class: Class II

Relative humidity: <80%

Ambient temperature: 10°C / 40 °C

CURING LIGHT MODE APPLICATIONS

CURING LIGHT MODE APPLICATIONS	
TACK	A very short initial cure for temporary processing before the final cure. For example when removing excess materials whilst bonding veneers or using temporary cement. Tack rings are included inside the box.
TURBO	Super fast curing for resin and composite that is no more than 2 mm thick. Also recommended for ceramic brackets, bonding veneers etc.
3' + 3'	3 Second Mesial + 3 Second Distal for metal brackets resin bonding (with 1 second blink in-between)
6' + 6'	6 Second Mesial + 6 Second Distal for metal brackets with bonding resin requiring more curing time and for buccal tube bonding (with 1 second blink in-between)
FULL	For general applications
RAMP	First 0-5 seconds are ramped for general application.
SOFT CURE	First 0-5 seconds are ramped for more gentle processing, designed for patients sensitive to heat.

C01-C / C01-S / C01-D CURING LIGHT DEPTH OF CURE

MODEL	C01-C (classic) Curing Time	Depth Measurements	ISO 4049 Depth Measurements (-50%)	C01-S (super power) Curing Time	Depth Measurements	ISO 4049 Depth Measurements (-50%)	C01-D (dual range) Curing Time	Depth Measurements	ISO 4049 Depth Measurements (-50%)
TURBO	5 seconds	4.2 mm	2.10 mm	4 seconds	4.6 mm	2.30 mm	4 seconds	4.3 mm	2.15 mm
FULL	10 seconds	4.3 mm	2.15 mm	10 seconds	5.1 mm	2.55 mm	10 seconds	4.4 mm	2.20 mm
RAMP	10 seconds	4.1 mm	2.05 mm	10 seconds	5.0 mm	2.50 mm	10 seconds	4.2 mm	2.10 mm
SOFT CURE	15 seconds	4.6 mm	2.30 mm	15 seconds	4.8 mm	2.40 mm	15 seconds	4.6 mm	2.30 mm

REMARKS: Above data is based on test results using an A2 shade composite. The light guide tip was placed above and pointed perpendicular to the composite. Tests were done as per ISO 4049 Standard. The samples were measured and the data was divided by two (50% of the total composite depth cured). ISO 4049 Standard requires that the results for class II restorative materials should be at least 1.5 mm for non-opaque shades and 1.0 mm for opaque shades. All resins and composites have different curing times. It is strongly recommended that you should test your composite and resin performance to determine the curing times required.

Data is only for reference, always follow the instructions from your resin and composite manufacturers.

- There are many variables (distance and angle between the light tip and composite, area, shade, thickness and type etc.) affecting composite curing times. It is recommended to place and cure a maximum of 2 mm for each composite placement.
- Using a barrier sleeve on the curing light will reduce 5-10% of light intensity.
- The light guide tip should be placed approximately 1-2 mm above the composite or resin and pointed perpendicular to the tooth surface.
- High intensity curing lights produce more heat. This is a direct indication of the power of the light being emitted. When using the device for more than 10 seconds, do not keep the light tip in one position. It is always recommended to use a dental syringe to blow a cold air flow on the area during long periods of curing. This will maintain a lower temperature for the composite and surrounding area, particularly when using rubber dam so as to avoid any rubber dam breakage due to heat built-up.
- Do not expose soft tissue to the light being emitted for more than 2 seconds or burns may occur.
- Avoid the light guide tip coming into contact with any soft tissue in the mouth.

A08 DENTAL APEX LOCATOR

- Bright LCD screen with the trajectory of the file being clearly indicated by different colours
- Foldable design with adjustable view angle, saves space and protects the screen
- The unit is designed with a smooth seamless body and membrane buttons to enhance cold sterilization and help avoid cross contamination
- Advanced multiple frequency technology with automatic calibrating ensures accurate measurement
- Measurement results are not affected by tooth type, size of root canal or the internal environment of root canal
- Different beep tones indicate the position of the file in the root canal
- Rechargeable lithium battery
- Accessories autoclavable up to 134°C
- Screen size: 110 mm x 70 mm
- Overall size: L122 mm x W118 mm x H25 mm
- Weight: 300 gms (including battery)

	SOFT	1 st five seconds from 0-900 mW/cm ² next 5, 10, 15, 20, 25 seconds 900 mW/cm ² ±10%
WEIGHT	86 gms	84 gms
LENGTH	230 mm	220 mm

C01-M / C02-M CURING LIGHT DEPTH OF CURE							
MODE	MODEL	C01-M (F.O. Light Guide) Curing Time	Depth Measurements	ISO 4049 Depth Measurements (-50%)	C02-M (Direct Light Source) Curing Time	Depth Measurements	ISO 4049 Depth Measurements (-50%)
FULL		10 seconds	4.3 mm	2.15 mm	10 seconds	5.1 mm	2.55 mm
SOFT		15 seconds	4.6 mm	2.30 mm	15 seconds	4.8 mm	2.40 mm

REMARKS: Above data is based on test results using an A2 shade composite. The light tip was placed above and pointed perpendicular to the composite. Tests were done as per ISO 4049 Standard. The samples were measured and the data was divided by two (50% of the total composite depth cured). ISO 4049 Standard requires that the results for class II restorative materials should be at least 1.5 mm for non-opaque shades and 1.0 mm for opaque shades. All resins and composites have different curing times. It is recommended that you should test your resins and composites performance to determine the curing times required.
