OFFERS ARE NOT VALID IN CONJUNCTION WITH ANY OTHER SPECIAL/BONUS OFFERS AND SUBJECT TO STOCK AVAILABILITY
 Goods sold are not returnable without prior approval. Returns and claims must be made within 10 days of delivery. Costs incurred by return goods will be at the sender's expense. Goods returned for credit or exchange must be unmarked and in a saleable condition.
 All accounts are strictly 30 days from invoice date. We reserve the right to charge 2% interest per month on overdue accounts.

DIAMOND FINISHING STRIPS - MIR 2.0 Interproximal reduction strips, single / double sided

SINGLE SIDE CODE (interproximal space)	10.323.207 (0.05 mm) SAW	10.323.218 (0.05 mm)	10.323.219 (0.10 mm)	10.323.220 (0.15 mm)	10.323.221 (0.20 mm)
DOUBLE SIDED CODE (interproximal space)		10.323.208 (0.10 mm)	10.323.209 (0.20 mm)	10.323.210 (0.30 mm)	10.323.211 (0.40 mm)
GRIT SIZE	without diamond coating	• extra fine	• fine	• medium	• coarse
SEQUENCE	white	yellow	red	blue	green
each	\$14.85	\$14.85	\$14.85	\$14.85	\$14.85

MIR 2.0 Kit, 10 pcs/pack ... \$88.00
 [2X white saw, 1X each for other colour saws]
 in both single and double sided

To obtain the indicated interproximal wear, follow the MIR 2.0 sequence (starting from the saw to the fine until coarse)

MIR 2.0 is recommended for use in interproximal and contact reduction, mesial/distal finishing and contouring, crown and bridge cement removal and clean up. Its SAW has no abrasive, but all other strips have diamond abrasives on single or double sided.

- Width: 7 mm

CHAMELEON DUAL SHAPER

Colourful Surface

Hardness + Resilience

Safe and Nontoxic

Biocompatibility

Anti-corrosion

**THE NANO COATED CHAMELEON SURFACE
HARDNESS IS INCREASED BY 168%
IMPROVING SERVICE LIFE BY 3-10 TIMES**

E18 DUAL SHAPER FILES CHAMELEON

NiTi heat activation

- A new root canal NiTi file system has been created using thermal activation, laser quenching and nano-coating
- Surface hardness of the file is increased by 168%
- Abrasion resistance increases greatly, improving the service life by 3-10 times

unique cutting edge design NiTi files

- **High strength**
Excellent corrosion and wear resistance, biocompatibility and high damping properties
- **Hyperelastic**
Super elasticity, will still recover shape after countless bending
- **Easy to shape**
Thermal activation of the NiTi wire, allows the file to be easily shaped so as to adapt to the natural form of the root canal

Operation process

- #10 K-File: probing the root canal
- "R" : opening the root canal
- "E16" : establishing a glide path
- "S" series: shaping and finishing

Highlights:

"E16" pro-path file can be used instead of manual glide files.
"E16" pro-path file, perfect for root canal anatomy and can be adapted to most root canals. Is efficient in establishing a glide path and improves safety.

Produced with micronized diamond powder. Use in chair side and dental labs for polishing of porcelains, resins and enamel, as well as gold or metal alloys, with advantages over conventional abrasives.

HAHNENKRATT RELAX AUTOCLAVABLE PLASTIC MIRRORS FRONT SURFACE RELAX - designed with a perfect blend of technology and ergonomics.

- Comfortably light weight for relaxed dental operations
- Comfortable to hold due to the ergonomic design with grip recess
- Keeping quality colour stable, resistant against acids as well as against plaque-indicators
- Comfortable for patients due to the smooth finish
- Hygienic due to the plane transition from mirror surface to mirror casing without any gap
- Silk-mat-finished reflectionfree surface

EDENTA AUTOCLAVABLE DIAMOND FINISHING STRIPS SINGLE SIDE COATED

Applications

- For contouring the proximal regions of all types of fillings
- Removing excess material from the proximal regions of filling - materials like composites, acrylics, glass ionomer cements and amalgam
- Removing excess cement after placing inlays, onlays and laminate veneers

Advantages

- Contours the proximal regions anatomically, **Length: 147 mm**
- Simplifies working procedures through the serrated edge which separates interdental spaces quickly
- The serrated diamond strips have wider non - diamond coated area, which simplifies sawing
- Serrated sawing edge and diamond - coated abrasive area combined in one instrument simplifies working procedures
- Made of highly stable stainless steel to resist breaking and stretching, for an economical service life

EDENTA DIAMOND FINISHING STRIPS

StripFIX finishing strip system (handle for diamond strip holder with click-plug system)

Different diamond strip holders are available, which are simply clamped between the fingers and make working in the mouth extremely difficult because of the space availability. The newly developed StripFIX finishing strip system makes working with diamond strips easier and more controlled. A user-friendly, ergonomic handle with special grip recess ensures enhanced control for reliable use of the StripFIX finishing system. The click-plug system enables easy, quick replacement of the diamond strip holders. The swivel-mounted diamond strip holders can each be locked in 4 positions. This ensures that the optimum working position (angle) of the diamond strip is fixed to enable easy access to the anterior and posterior teeth in the oral cavity. All components of the StripFIX finishing system are autoclavable and re-usable.

Application

Used for removing cement after cementation of crowns, bridges, inlays, onlays or veneers. Used for finishing and polishing interproximal fillings and for removing excess filling material. For dental hygienists to enable removal of discoloration that cannot be accessed with their instruments. In interproximal reduction (IPR), used for reducing interproximal enamel during orthodontic procedures.

StripFIX SET Contains one handle with special grip recess and 4 diamond strip holders.
