**ISOBUR DIAMOND BURS FG**

Special micro sized heads for minimal invasive, restorative dentistry and children's dentistry (paedodontology).

- *For every 2 boxes of ISOBUR Diamond Burs FG purchased (any mix)*
  - get one 050 Bur Dispenser (FG or MIX) FREE
  - (for Bur Dispenser details, please refer to p.3)
  - Buy 5 get 1 FREE (same number)

**Kiddies Fine FG**

- Highest precision during production guarantees unequaled concentric run of the instruments
- The specially UniMatrix® diamond coating improves stability of the instrument which results in extreme durability and long-life
- A wide variety of shapes is available for patient and technique-oriented selection.
**Turbo Super Coarse Diamond Isoburs FG** The Coarsest Diamond Available for Bulk Reduction.

**Take the Turbo Challenge!**

**Iso Turbo Diamonds** incorporate Unimatrix® diamond bonding with stainless shanks. Turbo Diamonds have a diamond free zone or “continual spiral of blank space” which offers several advantages:

- The diamond free zone breaks the surface contact of the instrument at the operative site, allowing water to flow promoting a cooler and cleaner cut. This maximizes cutting efficiency and eliminates excessive heat generation.
- Diamond free zones act like flutes on a bur which remove debris from the operative site. Since diamonds cut by grinding versus the chipping action of a carbide, Turbo’s will not catch or grab at amalgam or metal.
- The continual spiral design of the Turbo Diamonds leaves precise, smooth walled preparations.
- Turbo Diamonds are available in friction grip (FG) Super coarse only (180 µm diamond particle).

Intraoral Trimming of Titanium Abutments

The use of titanium abutments in implant prosthetics requires special instruments for adjustments and adaptation, for example recontouring for adapting the path of insertion of the restoration on the titanium abutments. The tungsten carbide instruments with a coarse cut, which were specially developed for trimming titanium alloys, guarantee optimal contouring of titanium materials (Figure 1). The titanium surfaces are then finished using the congruently shaped red ring finishers (Figure 2).

EDENTA SOFT TISSUE TRIMMERS FG

**Tissue Trimmer STT/FG-Shank:**

Designed for soft-tissue surgery, the STT ceramic tissue trimmer is a rotary instrument that can be used as an alternative to electrosurgery and surgical blades. The biocompatible hard oxide point is said to cut tissue without burning. Applications include modelling gingiva, opening the sulcus for impression, freeing intra-osseous implant sections and retracted teeth.

- **Speed:** Air turbine 300,000 - 500,000 rpm
- **Optimal without any water/spray cooling**

**Dimensions:**
- (L, mm) 10.0
- Size Ø 3/10 (mm) 014
- 5 pcs/box $68.75

**GF844 TwoGrit Diamond Burs FG**

Special diamond instrument used for preparing and finishing without changing the instrument when preparing for a veneer. The working section of the Two Grit diamond instruments consists of two different diamond grits.

- **The main conical section is coated with coarse diamond grit and the tip with fine diamond grit.**
- **The coarse grit enables rapid material removal and the fine diamond grit of the tip guarantees a perfectly finished preparation margin.**
- **Speed opt. 70,000 - 140,000 rpm.**

**EDENTA ADHESIVE REMOVERS FG/FGL/RA/RA/L**

The perfect completion of a bracket treatment. New adhesive remover, specially designed for this task. Removes adhesive residues, does not damage the enamel and creates smooth surfaces.

- The special blades remove the resin without injuring the tooth.
- The safety bevel at the end of the blades reduces the risk of cutting striations in the enamel surface.
- The various lengths of blade simplify trimming smaller and larger areas.
- The safe-tip prevents injury to the gingival margin.
- Available in FG or RA.

**Adhesive Removers, 5 pcs/box**

**EDENTA** SURGERY DIAMOND BURS FGXXL

**G254 Surgery Diamond**
Surgery diamond instrument used for removal and smoothing of bone surfaces as well as separation of teeth and effective machining of the tooth structure in tooth osteotomy. The special design and coordinated diamond grit guarantee gentle trimming of the bone and tooth structure with minimal heat build-up. Speed max. 100,000 rpm. Apply only light pressure during preparation.

**Buy 5 get 1 FREE**
Diamond coated bone cutter for bone incisions, removal and precision finishing. Also ideal for severing tooth roots.

Advantages:
- The combination of special shaping and diamond coating results in close contact with bone structure, less heat development as well as a better removal of bone chips and tooth structure.
- Always cool the area properly.
- Grit: green/coarse = 151 µm - ISO 534

EDENTA C163A TUNGSTEN CARBIDE BONE CUTTERS HP/RAL
Minimally Invasive and Precise Preparation in Oral Surgery
- Tungsten carbide bone cutter C163A with A cut design for optimum cutting capacity and precise preparation
- Atraumatic treatment provided by optimum chip removal, resulting in improved surface quality of the prepared bone material
- The high stability of the tungsten carbide bone cutter and the A cut design ensure optimum cutting capacity

Max. 100,000 rpm
Always use with water coolant

EDENTA C254A TUNGSTEN CARBIDE BONE CUTTERS FGXL/FGXXL
Bonde cutter used for preparing bone and tooth structure. The special A-cut blades guarantee very quiet instrument running at the highest cutting capacity with maximum conservation of the tooth structure to be prepared. The long, slimline neck provides excellent visibility during preparation. Indications: Exposing and removing impacted wisdom teeth, apicectomies, preparation of bone structure and a bone lid, separating teeth and tooth roots.

Drive: Only use a micromotor and red contra-angle. Do not use in a turbine as there is the risk of injury. Speed opt. 80,000 rpm. Apply only light pressure during preparation.
EDENTA CARBIDE BURS REGULAR FG/RA/HP

For Crown- & Bridge - Metal Separation
- Optimal cutting geometry
- High material reduction
- Virtually vibration-free
- Long term performance

EDENTA C34 TC CROWN SEPARATORS FG

User recommendations
- Resin Veneers can be separated directly with the C34 TC Crown Cutter.
- Ceramic Veneers must first be removed by a suitable diamond instrument. Thereafter, the metal crown can be separated with the C34 TC Crown Cutter.

Maximum Speed: 120,000 - 160,000 rpm
- Speed recommendations: Micromotor: precious metals = 100,000 rpm, Non-precious metals = 100,000 rpm, Air turbine: precious metals = 160,000 rpm, Non-precious metals = unsuitable
- Contact pressure: 0.5 N

CAUTION: Use spray coolant when preparing. Max. 20,000 rpm

Buy 5 get 1 FREE

EDENTA 5114RA SINTER DIAMOND DISC RA

To remove an all-porcelain restoration cut the restoration along the length of the axial wall to the centre of the occlusal surface or incisal edge using a sinter diamond disc Order no. 5114RA. Then bend the restoration open with a suitable instrument to make it fracture.

Caution: Use spray coolant when preparing. Max. 20,000 rpm

**SHOFU CROWN & BRIDGE PREPARATION KIT FG**

- Designed by experts in the field of restorative dentistry to provide efficiency and accuracy during crown and bridge preparation
- Speedy, simple and accurate tooth preparation can be done with 14 kinds of specially selected FG Diamond Points
- Usable for a wide range of crown and bridge preparation work such as, PFM of full metal crowns and bridges, full ceramic restorations, Veneers, Inlays and Onlays
- The Diamond Points are hygienically organized in an autoclavable aluminum bur block for convenient sterilization and replacement

**SHOFU ALL CERAMIC PREPARATION SET FG**

- The demand for ceramics in dentistry is at an all time high. Newer ceramic materials available today produce superb ceramic restorations. This is challenging the dental professional to consider newer materials, aesthetics, function, and clinical expertise when preparing an all ceramic restoration.
- Under the guidance of Dr. Takao Maruyama of Osaka University, and clinical expertise when preparing an all ceramic restoration.

**ORDER HOT LINE - TEL: 1300-130-718 FAX: 1300-130-719**
The Enamel Adjustment Kit has three Dura-White stones for adjusting natural dentition and porcelain and nine Ceramisté points for intra-oral polishing.

The Porcelain Adjustment Kit has three Dura-White stones for adjusting and nine Ceramisté points for polishing at chairside.

SHOFU VENEER KIT
Designed by Dr. George A. Freedman, this kit contains an optimal selection of instruments to assist the practitioner in all aspects of porcelain veneer placement: one regular-grit and two fine grit FG Robot diamond points, three T & F-grit Hybrid points, two CA Dura-White stones, six CA Ceramisté points, and two CA Ceramisté cups.

SHOFU PORCELAIN LAMINATE POLISHING KITS
Designed by Dr. Ronald E. Goldstein, this kit has fourteen assorted Ceramisté cups and Mid-point shapes for complete polishing.

SHOFU HYBRID DIAMOND BURS FG (in Carbide Bur Shapes)

SHOFU AMALGAM POLISHING KITS RA/FG
These abrasives are impregnated with polishing ingredients to provide fast, brilliant results without pumice or tin oxide. The kit includes three each Brownie cups and mini-points, two each Greenie cups and mini-points, one each Supergreenie cup and mini-point. Cups are for proximals, Mini points for occlusals.

SHOFU COMPOSITE FINISHING KITS RA/FG
For finishing and superpolishing cast gold/precious alloys, this kit includes six Brownie, three Greenie and three Supergreenie polishing points in KN7, PC2 and WH6 shapes.

SHOFU ENAMEL AND PORCELAIN ADJUSTMENT KITS HP
The Enamel Adjustment Kit has three Dura-White stones for adjusting natural dentition and porcelain and nine Ceramisté points for intra-oral polishing.

The Porcelain Adjustment Kit has three Dura-White stones for adjusting and nine Ceramisté points for polishing at chairside.

SHOFU HYBRID T & F DIAMOND BURS FG (in Carbide Bur Shapes)

SHOFU COMPOSITE POLISHING KIT RA
This kit is designed for finishing and polishing all types of composite materials. It has two Dura-Green and two Dura-White stones, six CompoSite points, and one each Composite Fine cup and disk.

SHOFU 0505 SUPER-SNAP MINI KIT RA
• No metal centre, will not gouge or discolour composite
• Improved mandrel design
• For safe, fast polishing without changing or inverting discs

SHOFU SUPER-SNAP AND SUPER-SNAP X-TREME SYSTEM

The new improved Super-Snap system has made an evolution to perfection.
The number of polishing steps has been reduced and the range of grits has been expanded. For optimal safety in polishing, the disks do not have metal centres, and the shanks are protected for maximum safety when working interproximally. The final polishing disks are double-sided, giving you maximum convenience and performance. The redesigned mandrel holds the disks firmly to ensure a safe grip.Finishing and polishing of composite has never easier and now Super Snap Ultra-thin, colour-coded disks indicate the grit and function to take you step-by-step to the finest restorations you can achieve. In addition, colour-coded polystrips have been added to complete the evolution of the new Super Snap Technique Kit.

- Thin, double-sided Disks (only for fine & super fine grits)
  For safe, fast polishing without changing or inverting discs
- Improved Mandrel Design
  Holds disks firmly for maximum control
- No Metal Centre
  Will not gouge or discolour composite
- New Black Coarse Disks
  Uniform (coarse grit) particles for fast, smooth composite contouring.

**Benefits**

- Integrated polishing paste in the disk ensures faster polishing of restorations while keeping the work area clean
- Disks can be soaked in water until soft and flexible to activate polishing compound just before use
- Thick disk design enables super polishing of occlusal surfaces efficiently
- Able to super polish multiple surfaces in a single bound without the mess of polishing pastes

**Introduction**

High gloss polish in a snap, with no messy paste ... no risk of cross contamination

**Indication**

Developed to achieve a high gloss polishing of all types of direct tooth coloured restorations

**Recommended Speed:** Range 8,000-12,000 rpm / Max. 15,000 rpm  
**Contact Pressure:** 0.8N

**Usage:** Moisten completely before use
### SHOFU ONEGLOSS ONE-STEP COMPOSITE FINISHERS AND POLISHERS

The OneGloss system works on all composites just by altering contact pressure.

Just compare OneGloss to the competition:
- It’s proven to be more durable
- It finishes and polishes better in just one-step
- It’s intended for single use (but is durable enough to last through an entire treatment)
- It costs 50% less than comparable brands
- It allows you to switch from finishing to polishing by simply altering contact pressure

### SHOFU 0950 HYBRID T & F KIT FG

- 25 micron trimming & finishing diamond burs FG for composites, enamel and porcelain

**0950 Hybrid T & F Kit FG ... $66.55**

**Buy 5 get 1 FREE**

### SHOFU SILICONE MIDI-POINTS UNMOUNTED

- For finishing enamel and composite restorations as well as stain and adhesive removal
- No metal centre, to prevent discolouring of the restoration
- Operating speed 3,000 - 10,000 r.p.m.
- A available in 25 pieces with OneGloss mandrel supplied

**Silicone Point Midi Unmounted 25 pcs/box $49.90**

**Buy 5 get 1 FREE**

### SHOFU DURA-GREEN® STONES RA/FG

Made of high quality silicone carbide grits, Dura-Green Stones are exceptional for fast contouring and finishing porcelain, composites, gold, silver and amalgam. These concentric, fast cutting stones come in CA and FG shank sizes.

**Dura Green Stones 12 pcs/box RA or FG ... $39.60**

**Buy 5 get 1 FREE**

### SHOFU DURA-WHITE® STONES RA/FG

For fine finishing enamel, composites and porcelain, nothing exceeds the performance of the Dura-White Stones. Made of micrograined aluminium oxide grit, each stone is perfectly balanced to provide vibration-free performance.

**Dura White Stones, 12 pcs/box RA or FG ... $39.60**

**Buy 5 get 1 FREE**

### SHOFU ACRYPOINT HP for acrylic polishing

**Quality Features:** Silicone polishers for finishing of denturese materails

**Dentist:** Polishing after contouring adjustments on acrylic dentures

**Technician:** Polishing acrylic dentures in critical areas (i.e. palatal arch) and at acrylic to metal junction

**Acrypoint BPI HP 6 pcs/box ...... $44.55**

**Acrypoint PC2 HP 12 pcs/box ... $44.55**

SHOFU CAD / CAM Tooth Preparation for Precise Scanning & Milling

11 shapes that guarantee precise preparation for CAD / CAM restoration

- High gloss polishing of restorations made of composites, compomers and glass ionomer cements
- Loaded with fine silicone carbide, no polishing paste required
- One step finishing and polishing
- Faster and more efficient than polishing paste systems
- Very economical
- Low heat generation
- Autoclavable

Diamond Finishing Strips

EDENTA AUTOCLAVABLE DIAMOND FINISHING STRIPS SINGLE SIDE COATED

Applications
- For contouring the proximal regions of all types of fillings
- Removing excess material from the proximal regions of filling - materials like composites, acrylics, glass ionomer cements and amalgam
- Removing excess cement after placing inlays, onlays and laminate veneers

Advantages
- Contours the proximal regions anatomically, Length: 147 mm
- Simplifies working procedures through the serrated edge which separates interdental spaces quickly
- The serrated diamond strips have wider non - diamond coated area, which simplifies sawing
- Serrated sawing edge and diamond - coated abrasive area combined in one instrument simplifies working procedures
- Made of highly stable stainless steel to resist breaking and stretching, for an economical service life
