## TURBO SUPER COARSE DIAMOND ISOBURS FG

The *Coarsest* Diamond Available for Bulk Reduction.

- The diamond free zone breaks the surface contact of the instrument at the operative site, allowing water to flow promoting a cooler and cleaner cut. This maximizes cutting efficiency and eliminates excessive heat generation
- Diamond free zones act like flutes on a bur which remove debris from the operative site. Since diamonds cut by grinding versus the chipping action of a carbide, Turbo's will not catch or grab at amalgam or metal
- The continual spiral design of the Turbo Diamonds leaves precise, smooth axial walled preparations
- Turbo Diamonds are available in friction grip (FG) Super coarse only (180 µm diamond particle)
