EDENTA ENDO ACCESS CARBIDE BURS FG / FGXL / FGXXL

Special endodontic bur with a long, conical blade configuration and cross-cut used for preparing a funnel-shaped access in the pulp chamber. The cross-cut guarantees quiet, efficient removal of tooth structure. The rounded, non-cutting bur tip (safe end) prevents penetration into the root canal walls and pulp chamber floor. Application after removal of the pulp chamber roof using the endodontic bur 802L for extending the access opening to ensure successful endodontic treatment.

H152

max. 120.000

EDENTA H152 ENDO CARBIDE BURS FG / FGL

Special endodontic drill with a long, conical blade configuration for producing a funnel-shaped access into the pulp chamber. The rounded, safe end drill tip prevents penetration into the root canal walls and the floor of the pulp chamber during drilling. Maximum motor speed 120,000 r.p.m., apply only light pressure during preparation.

5 pcs/pack	\$44.55	\$44.55	\$49.50

Special endodontic drill for reducing the pulp chamber roof and extending the access opening for successful root canal treatment. The long diamondcoated instrument neck facilitates producing a straight access to the root canal and creating a funnel-shaped access to the pulp chamber. The special diamond grit guarantees rapid and gentle removal of the tooth structure. Speed opt. 120,000 – 160,000 rpm. Apply only light pressure during preparation.

EDENTA H1SEB ENDO CARBIDE BURS RAXL

The efficiently cutting bur blades enable pressureless, minimally invasive preparation. The long, slender neck guarantees good visibility to the access cavity. Endoburs with L34 are particularly suitable for preparing under a microscope to ensure an optimum view of deeper areas of the pulp chamber, and showing the anatomy of the cavity chamber floor. This facilitates minimally invasive opening of root canal orifices and exposure of obliterated canals.

EDENTA H1SNL ENDO CARBIDE BURS RAXL

Efficiently cutting special endodontic bur used for detecting all root canals in the case of multirooted teeth. The H1SNL has a particularly high cutting efficiency and its long neck ensures a clear view in deeper regions of the cavity for opening the access cavity of the root canal system. Use in a contra-angle with micromotor at 1,500 - 2,000 rpm, without cooling, dry and apply only light pressure during preparation.

HAHNENKRATT CONTEC ROOT POST SYSTEM

Contec is designed for roots with rather conical shape.

The shape is designed with two different tapers and follows the natural shape of the root canal

- Utmost bending strength HT-Glassfiber: 1.678MPa
(Determined accordingly to EN ISO 178)
- Utmost fatigue and fracture resistance
- Homogeneity due to dentin-like elasticity
- Safe adhesion due to micro-retentive surface
- Effective, sharp cutting burs
- High radiopacity
