ISOBUR DIAMOND BURS FG KIDDIES

Special micro sized heads for minimal invasive, restorative dentistry and children's dentistry (paedodontology).

- Kiddies are specially designed for preparation in a child's mouth and for difficult-to-reach areas
- The specially designed tiny heads can easily clean and open fissures for sealing
- The shorter FG shank allows for precise work even in the rear molar area
- The tooth can be gently prepared with fine grit instruments
- Highest precision during production guarantees unequalled concentric run of the instruments
- The special UniMatrix® diamond coating improves stability of the instrument which results in extreme durability and long-life
- A wide variety of shapes is available for patient and technique-oriented selection.

Kiddies Fine FG each $8.80

TURBO SUPER COARSE DIAMOND ISOBURS FG The *Coarsest* Diamond Available for Bulk Reduction.

Diamond-free cooling zones absorb normal heat generation, resulting in fast reduction while remaining cool

Take the TURBO CHALLENGE!

ISO TURBO DIAMONDS incorporate Unimatrix® diamond bonding with stainless shanks. Turbo Diamonds have a diamond free zone or "continual spiral of blank space" which offers several advantages:

- The diamond free zone breaks the surface contact of the instrument at the operative site, allowing water to flow promoting a cooler and cleaner cut. This maximizes cutting efficiency and eliminates excessive heat generation
- Diamond free zones act like flutes on a bur which remove debris from the operative site. Since diamonds cut by grinding versus the chipping action of a carbide,Turbo's will not catch or grab at amalgam or metal
- The continual spiral design of the Turbo Diamonds leaves precise, smooth axial walled preparations
- Turbo Diamonds are available in friction grip (FG) Super coarse only (180 µm diamond particle)

Intraoral Trimming of Titanium Abutments

The use of titanium abutments in implant prosthetics requires special instruments for adjustments and adaptation, for example recontouring for adapting the path of insertion of the restoration on the titanium abutments. The tungsten carbide instruments with a coarse cross-cut, which were specially developed for trimming titanium alloys, guarantee optimal contouring of titanium materials (Figure 1). The titanium surfaces are then finished using the congruently shaped red ring finishers (Figure 2).

EDENTA SOFT TISSUE TRIMMERS FG

Tissue Trimmer STT/FG-Shank:

Designed for soft-tissue surgery, the STT ceramic tissue trimmer is a rotary instrument that can be used as an alternative to electrosurgery and surgical blades. The biocompatible hard oxide point is said to cut tissue without burning. Applications include modelling gingiva, opening the sulcus for impression, freeing deep cavities, lacerating inter-radicular granulation-tissue, removing gingival hyperplasia/papillectomies, and exposing intra-osseous implant sections and retinated teeth.

Speed: Air turbine 300.000 - 500.00 rpm
To be used without any water/spray cooling

EDENTA TWOGRIT DIAMOND BURS FG

GF844 TwoGrit Diamond

Special diamond instrument used for preparing and finishing without changing the instrument when preparing for a veneer. The working section of the Two Grit diamond instruments consists of two different diamond grits.
The main conical section is coated with coarse diamond grit and the tip with fine diamond grit. The coarse grit enables rapid material removal and the fine diamond grit of the tip guarantees a perfectly finished preparation margin. Speed opt. 70,000 - 140,000 rpm.

ORTHOFLEX POLISHERS RA (adhesive remover)

Buy 5 get 1 FREE (same number)

OrthoFlex Polisher (adhesive remover)

There are several methods used for removal of residual resin after debonding of orthodontic brackets. Therefore, the method of removal of the residual resin is very important to avoid damages on enamel. However, carbide burs are harder than enamel and when used at high speed, can damage the underlying enamel. We recommend using our new developed OrthoFlex Polisher which produces the finest scratch pattern with the least enamel loss. Advantages of the OrthoFlex polisher: Used for reliable, gentle removal of residual adhesive without damaging the natural tooth structure achieved by a special grit, which despite having a high polishing capacity is not harder than the natural tooth structure. Especially reliable alternative to adhesive or cement residue removal using rotary diamond or metal instruments.
After removal of the adhesive the teeth are re-polished using: Exa Cerapol 1 = pre-polishing enamel, 2 = polishing enamel, Cerapol Super 3 = natural high-lustre polish.

EDENTA ADHESIVE REMOVERS FG/FGL/RA/RAL

The perfect completion of a bracket treatment. New adhesive remover, specially designed for this task. Removes adhesive residues, does not damage the enamel and creates smooth surfaces.

- The special blades remove the resin without injuring the tooth
- The safety bevel at the end of the blades reduces the risk of cutting striations in the enamel surface
- The various lengths of blade simplify trimming smaller and larger areas
- The safe-tip prevents injury to the gingival margin
- Available in FG or RA

EDENTA C254A TUNGSTEN CARBIDE BONE CUTTERS FGXL/FGXXL

C254A Bone Cutter

Bone cutter used for preparing bone and tooth structure. The special A-cut blades guarantee very quiet instrument running at the highest cutting capacity with maximum conservation of the tooth structure to be prepared. The long, slimline neck provides excellent visibility during preparation. Indications: Exposing and removing impacted wisdom teeth, apicectomies, preparation of bone structure and a bone lid, separating teeth and tooth roots. Drive: Only use a micromotor and red contra-angle. Do not use in a turbine as there is the risk of injury. Speed opt. 80,000 rpm. Apply only light pressure during preparation.

EDENTA OSTEOTOM GSD1 SURGICAL DIAMOND BURS

Diamond coated bone cutter for bone incisions, removal and precision finishing. Also ideal for severing tooth roots.

Advantages:
The combination of special shaping and diamond coating results in close contact with bone structure, less heat development as well as a better removal of bone chips and tooth structure.

Always cool the area properly.

Grit:
green/coarse = 151 µm - ISO 534

For Crown- & Bridge - Metal Separation
- Optimal cutting geometry
- High material reduction
- Virtually vibration-free
- Long term performance

EDENTA C34 TC CROWN SEPARATORS FG

User recommendations

Resin Veneers can be separated directly with the C34 TC Crown Cutter.

Ceramic Veneers must first be removed by a suitable diamond instrument. Thereafter, the metal crown can be separated with the C34 TC Crown Cutter.

Maximum Speed : 120,000 - 160,000 rpm

Speed recommendations : Micromotor: precious metals = 100,000 µpm, Non-precious metals = 100,000 µpm,Air turbine: precious metals = 160,000 µpm, Non-precious metals = unsuitable

Contact pressure : 0.5 N

SHOFU ALL CERAMIC PREPARATION SET FG

Buy 5 get 1 FREE

The demand for ceramics in dentistry is at an all time high. Newer ceramic materials available today produce superb ceramic restorations. This is challenging the dental professional to consider newer materials, aesthetics, function, and clinical expertise when preparing an all ceramic restoration. Under the guidance of Dr.Takao Maruyama of Osaka University, Dr. Yoshihiko Mutobe and Shofu have developed a new all ceramic preparation system utilizing ceramic diamond burs to prepare an all ceramic restoration.

SHOFU SUPER-SNAP AND SUPER-SNAP X-TREME SYSTEM

The new improved Super-Snap system has made an evolution to perfection.

The number of polishing steps has been reduced and the range of grits has been expanded. For optimal safety in polishing, the disks do not have metal centres, and the shanks are protected for maximum safety when working interproximally. The final polishing disks are double-sided, giving you maximum convenience and performance. The redesigned mandrel holds the disks firmly to ensure a safe grip. Finishing and polishing of composite has never easier and now Super Snap Ultra-thin, colour-coded disks indicate the grit and function to take you step-by-step to the finest restorations you can achieve. In addition, colour -coded polystrips have been added to complete the evolution of the new Super Snap Technique Kit.

- **Thin, double-sided Disks (only for fine & super fine grits)**
  For safe, fast polishing without changing or inverting discs
- **Improved Mandrel Design**
  Holds disks firmly for maximum control
- **No Metal Centre**
  Will not gouge or discolour composite
- **New Black Coarse Disks**
  Uniform (coarse grit) particles for fast, smooth composite contouring.
- **Thin Polystrips**
  Interproximal finishing and polishing strips.
  Colour coded: Black/Violet (Coarse/Medium grits)
  Green/Red (Fine/Superfine grits)
- **New Kit Design**
  Semi-circular design for convenient access and easy identification of different grits of disks & strips.
- **More Disks**
  New kit contains 180 Disks (3 times more than the previous kit)

Buy 5 get 1 FREE (same item)

Introduction
The final step in polishing, it provides a smooth surface with minimal secondary scratches for a natural enamel-like luster. A highly polished surface also prevents staining and plaque accumulation for a durable restoration with greater resistance to secondary caries

Super-Buff is a specially designed aluminum oxide impregnated felt disk with easy to use snap-on system for superpolishing all direct resins.

Indication
Developed to achieve a high gloss polishing of all types of direct tooth coloured restorations

Benefits
- Integrated polishing paste in the disk ensures faster polishing of restorations while keeping the work area clean
- Disks can be soaked in water until soft and flexible to activate polishing compound just before use
- Thick disk design enables super polishing of occlusal surfaces efficiently
- Able to super polish multiple surfaces in a single bound without the mess of polishing pastes

Recommended Speed: Range 8,000-12,000 rpm / Max. 15,000 rpm Contact Pressure 0.8N
Usage: Moisten completely before use

SHOFU ONEGLOSS ONE-STEP COMPOSITE FINISHERS AND POLISHERS

The OneGloss system works on all composites just by altering contact pressure

Just compare OneGloss to the competition:

- It's proven to be more durable
- It finishes and polishes better in just one-step
- It's intended for single use (but is durable enough to last through an entire treatment)
- It costs 50% less than comparable brands
- It allows you to switch from finishing to polishing by simply altering contact pressure

0180 OneGloss Complete Set RA $115.50
(20 Cups, 20 Midi points, 20 Inverted Cone & 3 Mandrels)
0181 OneGloss Cup Refill 50 pcs/box $66.55
0182 OneGloss Midi Refill 50 pcs/box $66.55
0183 OneGloss Inverted Cone Refill 50 pcs/box .. $66.55
0435 OneGloss Mandrel CA 6 pcs/box $38.50

THE ONEGLOSS FEATURES AND BENEFITS	
Features	Benefits
One Stop /One Step	• Finishes & Polishes in one step • Reduces patient chair time • Eliminates additional polishing steps
Disposable	• Reduces sterilization cycles • Reduces clean-up between patients
Multi-Uses	• Finishes & Polishes composite restorations • Removes excess resin cement on tooth surface without marring enamel • Removes orthodontic cement after debanding & bracket removal • Removes stains from teeth • Polishes enamel after scaling
