

## SHOFU DIAMOND BURS FG

### MULTI-COATING TECHNIQUE

Shofu Diamond Points utilize multi-coating techniques with a special surface treatment for durability and less clogging, while maintaining cutting efficiency.

**Diamond Retaining Layer**  
**Special Coating Layer**

### GENTLE ON THE H/P CARTRIDGE

Every Shofu Diamond Point has a very smooth shank and conforms strictly to the ISO standards and specifications in order to ensure precise fitting to the handpiece cartridge

## SHOFU DIAMOND POINTS FG

are made by highly technological robots under a computer automated environment that is untouched by human hands.

Due to this technology every Diamond Point is guaranteed to have an even distribution of natural diamond particles over the working length of a single piece shank made of the highest quality stainless steel. This provides even and effortless cutting.

The demand for ceramics in dentistry is at an all time high. Newer ceramic materials available today produce superb ceramic restorations. This is challenging the dental professional to consider newer materials, aesthetics, function, and clinical expertise when preparing an all ceramic restoration. Under the guidance of Dr. Takao Maruyama of Osaka University, Dr. Yoshihiko Mutoke and Shofu have developed a new all ceramic preparation system utilizing ceramic diamond burs to prepare an all ceramic restoration.
