## The new improved Super-Snap system has made an evolution to perfection

The number of polishing steps has been reduced and the range of grits has been expanded. For optimal safety in polishing, the disks **do not have metal centres**, and the shanks are protected for maximum safety when working interproximally. The final polishing disks are double-sided, giving you maximum convenience and performance. The redesigned mandrel holds the disks firmly to ensure a safe grip. Finishing and polishing of composite has never easier and now Super Snap Ultra-thin, colour-coded disks indicate the grit and function to take you step-by-step to the finest restorations you can achieve. In addition, colour-coded polystrips have been added to complete the evolution of the new Super Snap Technique Kit.

### • Thin, double-sided Disks (only for fine & super fine grits)

For safe, fast polishing without changing or inverting discs

### • Improved Mandrel Design

Holds disks firmly for maximum control

### • No Metal Centre

Will not gouge or discolour composite

### • New Black Coarse Disks

Uniform (coarse grit) particles for fast, smooth composite contouring.

### • Thin Polystrips

Interproximal finishing and polishing strips. Colour coded:  
**Black/Violet** (Coarse/Medium grits)  
**Green/Red** (Fine/Superfine grits)

### • New Kit Design

Semi-circular design for convenient access and easy identification of different grits of disks & strips.

### • More Disks

New 0500 full kit contains 180 Disks
